- Manage a test laboratory in on- premise based or cloud based environment, hosted in a secure environment.
- A complete solution to run test laboratory Business in an automated environment including Office and Lab Operations.
- Easy configuration of 100s of different tests, and automated interfaces with incubators and test machines .
- Manage workload, manage clients, generate automated test reports and a lot more.

EYE3 LIMS is a laboratory information management system (LIMS) software that focuses on sample management at time of receipt, during registration, throughout the workflow process, and in storage or disposal.

For your LIMS needs, EYE3 LIMS is offered as a client on-premise or cloud-hosted solution. As a hosted software, EYE3 LIMS requires no IT support for deployment, allowing your laboratory to manage your samples. By offering EYE3 LIMS Cloud as a cloud-hosted Software as a Service (SaaS) LIMS, you can access the system anywhere, and at any time, via a web browser.

EYE3 LIMS is a modern LIMS platform using cutting edge technology to manage test laboratories. The applications are natively unified with all the operations of test laboratories from the ground up, resulting in a completely seamless user experience. Extra modules can be incorporated into the application to suit your unique requirements.

Service Features and Benefits

TECHNICAL SUPPORT

24/7 IT Support, 365 days of the year – Our expert engineers are on hand all day, all night and even during bank holidays, so you know we'll always be on hand to provide you with the IT support you need, when you need it.

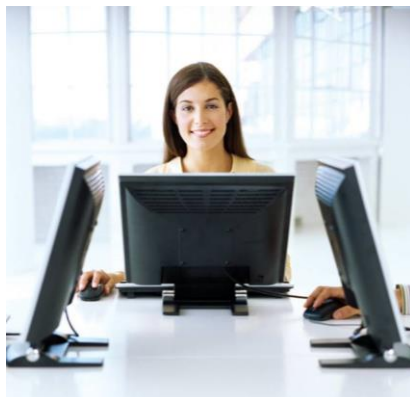

ZERO DOWNTIME

Solution runs on cloud based hosting with zero downtime. If you choose on-premise based solution we provide installation support on load-balanced servers.

For more information on any of our products or services please contact us at:

Email : info@eye3.co.uk

Phone : +(44) 0208 036 3335

The following features are fully integrated into EYE3 LIMS:

Barcodes:

EYE3 LIMS can be used with any Windows compatible barcode scanner or printing device.

Any data that is available in the data base can be included on a barcode label in human-readable or barcode font.

Sample Check-In and Test Management:

EYE3 LIMS provides comprehensive functionality surrounding sample check-in, providing many different manual sample check-in and file import schemes as well as powerful interfaces designed to enable the sample login process to be completely automated.

Samples can be logged via file import (csv, txt, ASCII, XML, etc.) or via interface with an external software application.

Inventory Manager:

EYE3 LIM's Inventory Manager provides functionality to track quantity, location, expiry date, and client information for items.

External Linking:

EYE3 LIMS provides links between all database records and also integrates with machine interfaces to automate test result recording. It also interfaces with external providers e.g. suppliers, delivery services.

Reporting:

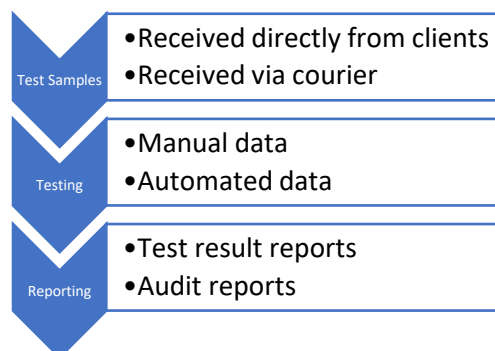

EYE3 LIMS provides comprehensive reporting including Test results, inventory management, workloads etc. Automated reports can be configured for stakeholders.

There are a number of other features that help run a test laboratory *smoothly*, for a comprehensive list please contact us for a demo.
